

Chemotherapy doesn't have to make you sick  
**Is the patch right for you?**  
TALK TO YOUR HEALTHCARE PROFESSIONAL

Print this information and discuss any questions with your healthcare professional to decide if SANCUSO is right for you.

Are you aware of the type of chemotherapy regimen you are on or that you will be on?

- Yes, I am aware     No, I'd like to discuss with my healthcare professional

Have you ever experienced nausea and vomiting?

- Yes     No

Are you worried about experiencing chemotherapy induced nausea and vomiting?

- Yes     No

Are you worried that chemotherapy induced nausea and vomiting will affect your daily activities?

- Yes     No

Do you have trouble swallowing pills?

- Yes     No

Have you ever used a patch in the past, such as a nicotine patch or a birth control patch?

- Yes     No

How would you feel about wearing a patch to prevent chemotherapy induced nausea and vomiting?

Discuss these feelings with your healthcare professional.

- I would prefer something simple     I would rather apply 1 single patch than have to take daily medication  
 I would prefer a continuous medication that contains 5 days of prevention

### IMPORTANT SAFETY INFORMATION FOR PATIENTS

SANCUSO (Granisetron Transdermal System) is indicated for the prevention of nausea and vomiting in patients receiving moderately and/or highly emetogenic chemotherapy regimens of up to 5 consecutive days duration.<sup>1</sup> Do not use SANCUSO if you are allergic to granisetron or any of the other ingredients in SANCUSO.<sup>1</sup> Do not use SANCUSO if you are pregnant or breastfeeding unless your healthcare professional has told you that you can use it. Tell your healthcare professional if you are pregnant, if you become pregnant, or plan to become pregnant while using SANCUSO, or if you are breastfeeding or plan to breastfeed.<sup>1</sup> Tell your healthcare professional if you have pain or swelling in your stomach area (abdomen), or if you are allergic to medical adhesive tape, adhesive dressings or other skin patches.<sup>1</sup> Tell your healthcare professional about all the medicines you take, including prescription and nonprescription medicines, vitamins, and herbal supplements. Other medicines may affect how SANCUSO works. SANCUSO may also affect how your other medicines work.<sup>1</sup> The medicine in SANCUSO (granisetron) may not work well and/or may affect your skin if exposed to direct sunlight and the light from sunlamps or tanning beds. While wearing the patch keep it covered with clothing if you will be in sunlight or near a sunlamp, including tanning beds. Keep the skin where SANCUSO was applied covered for another 10 days after the patch is taken off to protect from exposure to direct sunlight.<sup>1</sup> You may see mild redness on the skin where the patch is removed. This redness should go away within three days. If redness continues, tell your healthcare professional.<sup>1</sup> The most common side effect of SANCUSO is constipation.<sup>1</sup> Tell your healthcare professional if you have any side effect that bothers you or that does not go away. This is not the only possible side effect of SANCUSO.<sup>1</sup> For more information, ask your healthcare professional or pharmacist.
